Used Aircraft Market	CAGR to 2035	Brazil Exec Fleet	Controller.com Visits/mo

The Problem

A $37B market running on 1990s technology

Legacy UX

Controller.com, the market leader with 900K monthly visits, has App Store reviews citing "added unnecessary steps" and "deliberately less user friendly" after updates.

No Price Transparency

No automated valuation tools. Buyers have zero pricing intelligence. Deals rely on broker relationships and opaque negotiations.

Brazil Underserved

9,824 executive aircraft with no modern marketplace. Sellers use WhatsApp groups, fragmented classifieds (AeronavesAVenda ~569 listings), and broker networks.

The Disruption Thesis

Controller.com generates ~$18M revenue with legacy technology inherited from print classifieds.

Its competitive advantage is purely liquidity-based, not product-based. User reviews confirm frustration.

AeroDesk can capture share by delivering 10x better experience — starting in Brazil where Controller has zero presence.
